

# Now we can announce it— the multi-disk drive System Three Computer

**A fast Z80 microcomputer with up to 512 kilobytes of RAM, 4 disk drives and 1 megabyte of disk storage—with CRT terminal and fast printer. Even an optional PROM programmer. Strong software support, too, like FORTRAN IV, Extended BASIC, and Macro Assembler.**

## **PROFESSIONAL GRADE— FOR PROFESSIONALS**

Chances are you've already heard that there is a Cromemco System Three Computer. We've proudly previewed it at WESCON on the West Coast and NYPC on the East Coast.

But you also know Cromemco. We don't announce until we're ready to ship.

### **Now we're ready.**

And what a computer we've got for you.

It does it all.

It's a complete system—processor, CRT terminal, line printer.

First, it's fast—1 microsecond nominal execution time and 250 nanosecond cycle time.

Its equally fast RAM memory is large and enormously expandable—32 kilobytes expandable to 512 kilobytes. No danger of obsolescence from inadequate RAM capacity.

## **THE ONLY MICROCOMPUTER OFFERING 4 DISK DRIVES**

Further, the System Three comes with two disk drives to give you 512 kilobytes of disk storage. Soft-sectored IBM format. Optionally, you can have four drives with 1 megabyte of storage.

There's disk protection, too, since in the LOCK position disks can't be ejected while they are running.

### **21-SLOT MOTHERBOARD**

This new CS-3 is a computer that won't be outdated soon. It has a 21-card-slot slide-out motherboard and an S-100 bus so that you can plug in all sorts of support circuitry. The heavy-duty 30-amp power supply can easily handle all this.

### **BROAD S-100 SUPPORT**

The S-100 is the bus that Cromemco so strongly supports with over a dozen plug-in circuits ranging

from analog I/O to high-speed RAM memory with our bank-select feature.

### **TRULY POWERFUL SOFTWARE**

You have to have software. And Cromemco is far in front there, too. Our FORTRAN IV, for example, is equal to the FORTRAN compilers on large mainframes. Further, it (and our other software) is low-priced.

Our 16K Z80 BASIC is one of the fastest and most capable. Full 14-digit precision.

There's also our Z80 Macro Assembler and Linking Loader. Uses Z80 mnemonics. Allows referencing FORTRAN common blocks.

### **CRT TERMINAL AND PRINTER**

The CS-3 terminal has 80-character lines and a 24-line page with line and page editing.

Note the separate numeric keypad and cursor keypad.

The printer is fast—180 characters per second; 132-column lines.

### **SEE AT YOUR DEALER**

You have to see the CS-3 to fully appreciate it and its low prices starting at \$5990 in the rack mount version.

See it at your local dealer shown on the other side of this page. He has a demo to show you.

He also has brochures giving you details.

You know the CS-3 is going to be a sensation.

Better contact your dealer now.

page

For office situations new System Three can be provided with walnut floor cabinet. Metal bench cabinet also available. Unit is normally rack-mount style.

System Three front panel swings open and 21-slot motherboard/circuit cage slides forward for easy insertion of extra circuit boards.

Retainer bar secures circuit cards firmly in sockets.

Optional panel PROM programmer has two sockets to facilitate duplicating PROM content.
